October 2015

## 'Orizio knits Innovation at ITMA 2015 Milan'

With less than 1 month to go until Itma 2015 to be held in Milan from 12<sup>th</sup> to 19<sup>th</sup> November 2015, Orizio Circular Knitting Machine manufacturer group is going to show its latest novelties. A wide range of circular knitting machines will be displayed during the show starting from high performance single and double jersey machines up to electronic models and a new special machine for high pile and special fabrics for outdoorwear.

Significant are the Orizio efforts in sustainability, the company aim to reduce consumption and useless wastes of materials now become a fundamental principle. The concept of high-level engineering products at achievable prices has highlighted the increasing range of new models.

The machines displayed during the show by the Orizio group will be seven, Hall 5, stand H115-116.

Sinkerless technology from 20 to 80 gauge with 90 feeds on 30" diameter (24" - 42").

The development of single jersey sinkerless machines has made of the Orizio sinkerless a simple and perfectly reliable knitting machine able to knit impressive top quality fabrics. Introduced this year JFP model produces high quality jersey and jersey with lycra for sinkerless stitch structure fabrics. Equipped with the performing Orizio LC open frame with electric cutter, pneumatic roll expulsion and a brand new control system with touch screen, the JFP is a feather in Orizio's cap.

New mechanical developments that save wear and tear of needles also help the decrease of energy consumption.

High pile technology.

Impalpable and wafer-thin or voluminous, faux fur has always featured in the collections of fashion maisons, but it has never been as fresh as today thanks to an unexpected level of innovation in its processing and production. Today faux fur is stimulating the creativity of designers that care of sustainability and ecology.

The new Orizio PLE machine version is an electronic single jersey machine for the production of top quality high pile fabrics, with multiple colours high dimension patterns. Available in 24 inches diameter with 18 feeders or 38 inches diameter with 24 feeders. Gauges are 10, 12, 14 and and 16 Npi in each instance. Available in standard configuration of 2 way technique (predisposed for conversion to 4 way technique). PLE machine is capable of up to 6 colour reversible jacquards, with one side incorporating the jacquard as pile fabric. Piqué, fleece and honeycomb on the ground structure are other possibilities with double sided fabric that includes jacquard pile on the other side.

It is a massive advantage of Orizio high pile silver knitting machines that they are called upon to serve a wide variety of needs, both functional and aesthetic of such an exceptionally diverse range of end-uses. This is a good chance for the Orizio customers to stimulate many new and different markets.

Electronic jacquard and striper on fleece.

A revolutionary jacquard machine with electronic needles selection with 3 colours electronic stripers on loop and/or ground yarn will be presented at the show.
